

Roll-In Remote Refrigeration by others (Third-Party):
Sale conditions and warranty outline.

Conditions:

All remote condenser installation by others (third-party) are on a case-by-case basis and will require an outline of the proposed third- party system to be used.
IRINOX cabinets are compatible with R404A refrigerant only.
Once the third-party system submits the system details and it is approved by IRINOX and IRINOX North America receives signed acknowledgements of the conditions as outlined from the end user/consultant/installation contractor/dealer (responsible party), IRINOX North America can proceed with ordering from the factory.

Warranty:

Cabinet, two (2) years parts and standard reasonable labor charges.

Exclusions:

IRINOX will not warranty any refrigeration parts or components that are not purchased directly from IRINOX North America, including any part of the remote condensing system. In addition, IRINOX North America does not warranty any plumbing, piping, or electrical installed by a third-party(s) or the performance of refrigeration systems including cabinet temperatures and/or product pull down times as outlined on the IRINOX spec sheets. Furthermore, the end user / consultant / dealer / installation contractor recognizes that there is no direct communication cable between the cabinet and condensing system. When installing an IRINOX condensing system this communication cable would normally relay critical error codes to the control panel should there be an issue with the condensing system.

IRINOX at any time reserves the right to refuse to provide the cabinet should IRINOX deem the third-party refrigeration package inadequate and does not meet basic HP, electrical, BTU benchmarks or for any other reason that the unit will not perform to its intended standards.

I hereby accept the conditions as stated above, accepted by:
